

Top 5 Reasons

TO EARN YOUR DEGREE FROM WASHU

Speak with current MArch, MLA, and MUD students in our livestream
Student Life Webinar: Friday, March 29 at 11:30a

1: OUR FACULTY

In addition to our expert core faculty, the Sam Fox School brings cutting-edge architects, designers, artists, researchers, and curators to campus each semester. Through lectures, workshops, and studio instruction, you'll learn firsthand from global leaders in their field.

2: SOCIALLY ENGAGED PROGRAMS

Our projects tackle global challenges one building, neighborhood, and city at a time. Through our Office for Socially Engaged Practice, you'll learn to design for access, for equity, for conservation, and for sustainability.

3: LAUNCHING YOUR CAREER

Our programs foster leadership skills to prepare you for expansive, ambitious careers. Our dedicated Career Services Office offers one-on-one advising with a practicing architect, as well as workshops, career fairs, and road shows. We maintain close ties with our alumni, so you will graduate with a built-in network around the world.

4: DUAL + JOINT DEGREES

One in four Sam Fox School students earns a combined degree. You can earn a dual master's degree in Architecture,

Urban Design, or Landscape Architecture, or pursue a joint degree in Business, Construction Management, Computer Science & Engineering, or Social Work.

5: LOCAL FOCUS, GLOBAL OUTLOOK

St. Louis is one of the most affordable, culturally exciting cities in which to launch your career. Beloved for its distinctive red brick and incredible urban parks, all the city's art museums and most of its major cultural institutions are free. This is a city that reveres its designers, artists, thinkers, and makers, and our students are lively contributors to its culture.

NEW FACILITIES OPENING FALL 2019

When it opens this fall, Anabeth and John Weil Hall, an 82,000-square-foot facility designed by KieranTimberlake, will bring together all the graduate programs in the Sam Fox School. It will include state-of-the-art studios, classrooms, and digital fabrication spaces. Weil Hall will be place for students and faculty to gather, collaborate, and create new approaches to design and sustainability in the 21st century.
